

qa-gist.md

Gist QA scenarios

Preparation

Before starting, you will need:

- Testing framework of your choice.
- Git.
- 2 hours of your time.

The Exercise

For this exercise, you will be creating a end-to-end (e2e) tests for creating a gist.

User Stories

- As a user, I want to create a public gist.
- As a user, I want to edit an existing gist.
- As a user, I want to delete an existing gist.
- As a user, I want to see my list of gists.

Notes

- User credentials should be configurable, do not include your credentials in the submission.

Evaluation Checklist

- Code quality & readability: Will an average engineer be able to understand the tests just by briefly scanning through the source code?
- Case coverage: Does the test cover all possible user scenarios?
